# GLOBAL DESIGN PRINCIPLES

# TV for TV people.

Haanta is where Africa meets the world

1 Empowerment

Supporting African artisans and entrepreneurs.

2 Culture and Heritage

Honoring Africa’s rich traditions through modern design.

3 Quality Assurance

Curating and verifying every product to meet global standards.

4 Community

Building a global community that appreciates and uplifts African creativity.

# DESIGN TOOLKIT

## Overview

Logo

Lockups

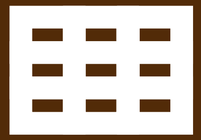

Color

Typography

Iconography

Grid

# Trademarks

# We use our logo with pride and fill it with meaning.

## Logo

The Haanta logo is the primary visual icon of our identity. The stylized, mono-weight lower-case letter forms should never be altered or compromised.

This and other toolkit assets can be downloaded here.

**Logo Safe Zone**

The logo's safe zone is equivalent to the height of the 'u' on all sides.

**Logo Hero Palette**

Wherever possible, the logo should be appear in all colors like it appears on a white background. Incases where we want to make an impact by using a brown background, the logo can be Tan color (#D2B48C).

A Tan logo over gradient background is preferred in most cases.

**Logo Lockups**

## The Lockups

The Haanta logo lockups are comprised of the Haanta icon and the word "Haanta" set in Segikan bold.

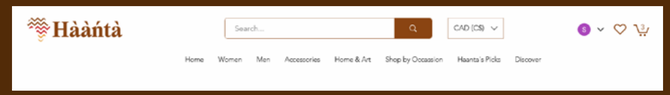

Hààńtà

Hààńtà

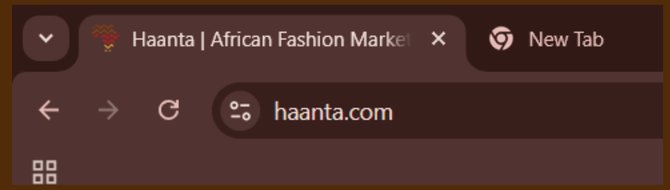

## The Favicon

Used in Product to denote exclusive Haanta, this badge ensures legibility regardless of the background.

**Examples**

Haanta Website

Favicon

**Logo Lockups**

There are different lockup formats depending on the type of partnership. The Haanta and partner logos should always have equal visual weight.

## Ongoing Partnerships

Use a vertical pipe which is 150% of the height of the “H” in Haanta for ongoing business-level partnerships.

Hàànta | ANIKE OLOGE

Hàànta | MAPLE STREET

## One-off Partnerships

Use an “x” set in white Avenir Medium raised above the baseline to appear vertically centered.

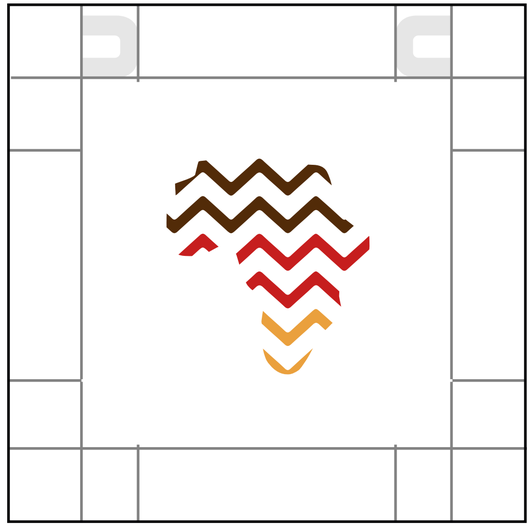

Hàànta x Company1 Logo

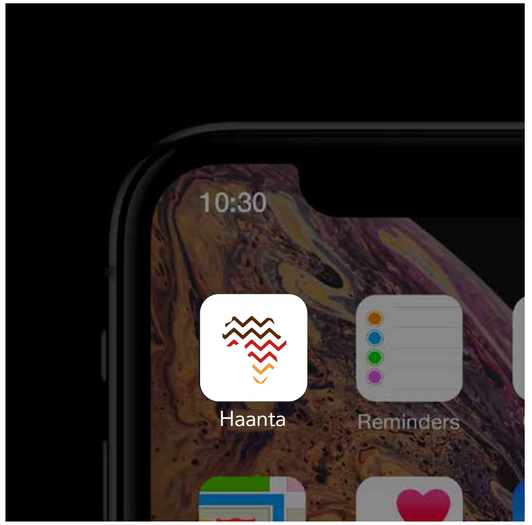

Hàànta x Company2 Logo

## App Icons

App icons are individually designed, based on specifications, but the light source in the gradient should always come from the top right to align with gradients in our UI.

The following schematic provides guidance on the logo sizing.

# Color

# Color is how we tell stories and turn heads.

Haanta Brow

Brown is good. It sets us apart, and it’s the first thing you think of when you think Haanta.

# Haanta Brown

**Primary Colors**

Our primary colors form the base of our design system.

## Haanta Tan

Our primary brand color represents the fresh distinctiveness of our brand.

#d2b48c

R 210
G 180
B 140

C 18
M 28
Y 48
K 0

## Haanta Brown

Our secondary color is used only in combination with Haanta Tan.

#522b08

R 4
G 4
B 5

C 60
M 40
Y 40
K 100

## Dynamic Gradient

Used as a background to create depth and bring an earthy tones to show African culture and vibe

#8b4512 to #502404

Light source generally comes from the bottom right for Marketing. For Product Design, it generally comes from the top right.

## Secondary Red

Secondary Green is used sparingly in digital creative. It is to be used in combination with white or very light colors. Unlike our Haanta brown, this meets color contrast accessibility standards.

#a52a2a

R 165
G 42
B 42

## Accent 1

## Accent 2

## Usage Proportions

The main color world is Haanta Brown used around 60% of the time. Clean Tan allows us to deliver a striking brand presence when needed. The Business Time/Accent color world should be used more sparingly, making up a very small part of the identity.

Haanta Brown: 60%

Clean Tan: 30%

Business time: 10%

# Typography

# Typography is our visual voice. Bringing range, nuance and attitude to what we have to say.

## Typeface

Haanta uses the Avenir type family in all applications.

And CInzel type occasionally for headlines in our markerting

**Google Slides**
When using Google Slides, use Montserrat

**Vendors**
Coordinate with Commercial Type on purchase of the appropriate license for their project (e.g. Web, App, Desktop, etc.)

Avenir Rom
Avenir Ligh
Avenir bla
Avenir bla
Avenir Me

Core Overview

This is our everyday expression. Clear hierarchy of information ensures ease of use for more functional moments in our brand.

## Where to use

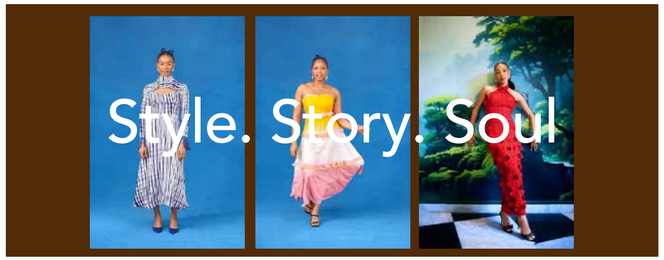

- Brand campaigns
- Evergreen brand creative
- Performance marketing

| | Weight | Leading | Tracking | |
|---|---|---|---|---|
| | | | Ems | Percent |
| **HEADLINE** | Bold | 90% | -25 | -3% |
| **Conversational Headline** | Bold | 115% | -18 | -2% |
| Section Header | Regular | 115% | -18 | -2% |
| Subhead | Regular | 125% | 0 | 0 |
| Body | Regular | Auto | 10 +/- based on size & legibility | +1% +/- based on size & legibility |

## Typography DON'TS

Don't rotate typography.

Avoid blocking key features and faces with typography.

Don't use the dimensional glow on typography.

Don't use outlined text over imagery.

**Core Examples**

## HEADLINE

Use for shorter headlines which aren't a full sentence, declarative statements, or tune-in messaging.

## Conversational Headline

Use to convey Haanta's voice in longer headlines which are full sentences. Sentence case should be used here.

## Section Header

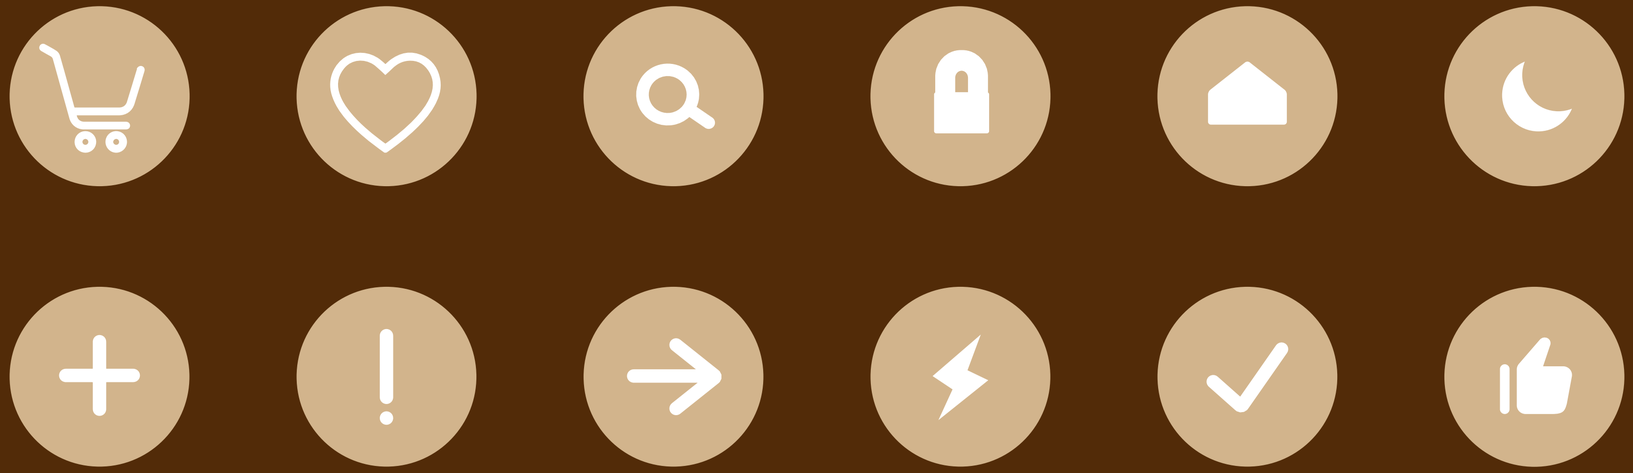

Use in instances where there are multiple headers (i.e on a landing page). These usually come after / below a bold headline.

# Iconography

# Our icons help tell a story while adding some fun.

**Marketing Icons**

Our Icons are emotive and a navigational language in marketing.

# Grids

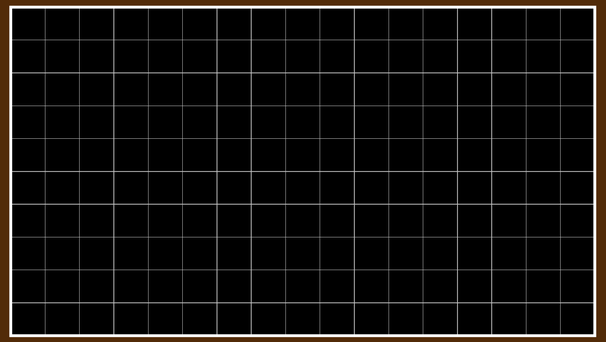

# Don’t underestimate the power of the grid. A simple, flexible system that aligns Haanta on all platforms.

**Grid Principles**

We have three principles for creating our grid system.

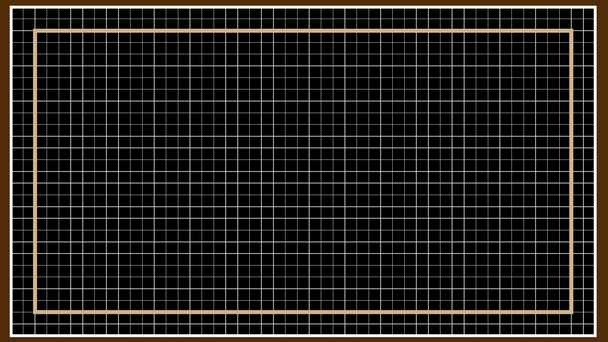

## Even Spacing

A 1:1 grid ensures even spacing between elements.

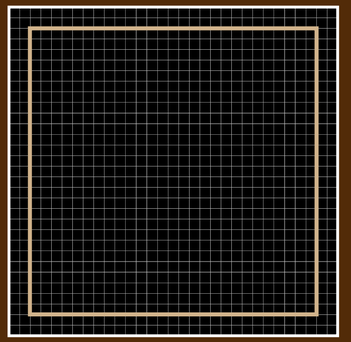

## Even Margins

Margins must be equally balanced and consist of two grid units.

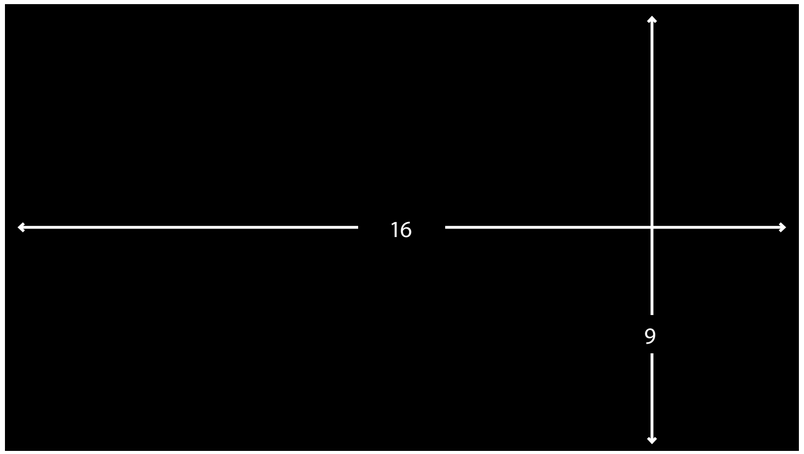

## Flexibility

1:1 grid density adapts to accommodate different formats.

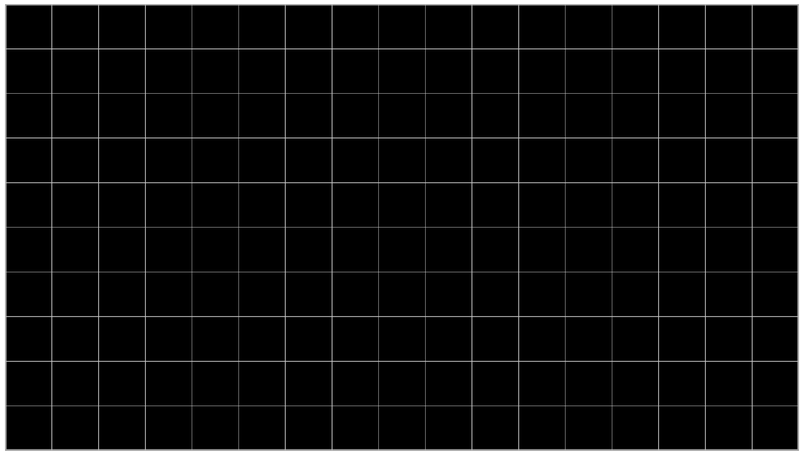

**Grid Construction**

Using the following approach, we can create a consistent 1:1 grid system that works across all formats.

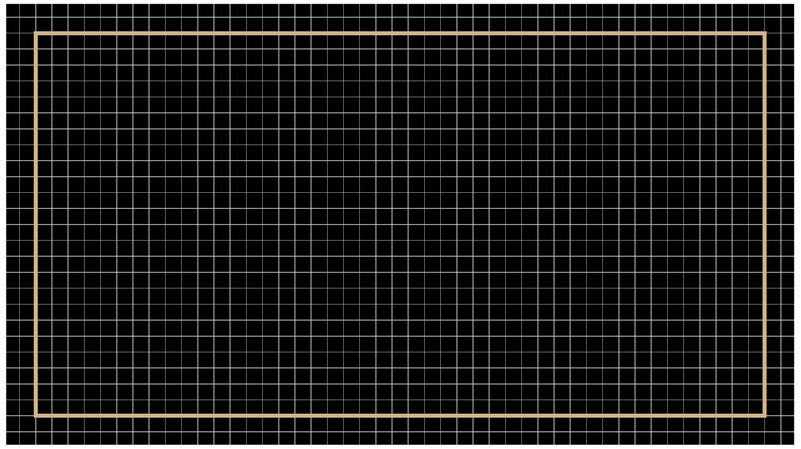

Define the aspect ratio of the format.

Digital Landscape
Aspect Ratio: 16:9

Use the aspect ratio to create a 1:1 grid. 16 units across by 9 down.

Digital Landscape
Units: 16 x 9

Then multiply the grid units equally to ensure the grid is dense enough and creates a flexible design canvas.

Digital Landscape
Grid: 48 x 27
